

Compact Double Plastic Bucket System

Stainless Steel cart with removable handle and two 5 gallon (20L) polypropylene buckets

Description

The durable yet lightweight 2757 cart has four casters, two fixed and two that swivel and lock easily with the touch of a foot. The system can be used with two or three buckets, depending upon cleaning protocols. An extendable frame pulls out of the front of the cart to accommodate an additional bucket. Trolley handle is removable for easier autoclaving and storing. The system's compact design improves maneuverability and reduces storage space. Included stainless steel connecting kit prevents drips between buckets. Wringer is purchased separately. Choose from optional wringers 2710 (downpress), 2756 (flat press), 2767 (Flat mop sieve), 2768 (EasyCurve sieve), 2765 (Wringer frame) or 2759 (Slinger) shown below. This mopping system is compatible with all Contec mops, depending upon wringer choice. Autoclavable at 121°C for 30 minutes

Technical Information	
Materials of Construction	
Cart	Stainless Steel, Type 304
Autoclavable plastic buckets	Polypropylene / Copolymer
Casters	Stainless steel frames with blue Kryptonite™ autoclavable wheels
